

Accu-Chek® Insight Flex Training Chart

The Accu-Chek Insight Flex infusion set is intended for the subcutaneous infusion of insulin with an Accu-Chek Insight insulin pump.

- A** Adhesive plaster
- B** Adhesive liner
- C** Connector plate
- D** Introducer needle
- E** Needle box
- F** Button
- G** Disconnect cover
- H** Transfer set (tubing)

1 Before unpacking your infusion set, wash your hands thoroughly. Choose and disinfect your infusion site as instructed by your doctor or healthcare team.

2 Peel both parts of the adhesive liner away from the adhesive plaster.

3 Push the button until it stops. The introducer needle with the soft cannula snaps out.

4 Insert the infusion set at a 90° angle. Choose an infusion site away from your waistline, bones, any scar tissue, belly button and recent infusion sites.

5 Press the adhesive plaster firmly onto the infusion site, ensuring that it makes good contact with the skin.

6 Remove the needle box with the introducer needle, leaving the adhesive plaster and the connector plate in place. The introducer needle snaps back into the needle box automatically.

7 Attach the transfer set to the insulin pump and prime it according to the instructions provided with the insulin pump. Make sure it is free from air bubbles.

8 Connect the primed transfer set to the connector plate. Before resuming insulin pump therapy, fill the head set and the soft cannula with 0.7 U of insulin.

Soft cannula	Length:	6 mm	8 mm	10 mm
	Prime volume:	0,7 U*	0,7 U*	0,7 U*
Tubing	Length:	40 cm 16 inches	70 cm 28 inches	100 cm 39 inches
	Prime volume:	7 U*	11 U*	15 U*

* U 100 insulin
